Somya Ranjan Sahoo

Software Developer · Node.js · Python · SQL · Excel

Bhubaneswar, Odisha, India · +91 82605 53203 · 6422somyaranjansahoo@gmail.com · linkedin.com/in/somya-ranjan-sahoo-109599312 · github.com/somyaranjansahoo6422 · somyaranjansahoo6422.github.io

SUMMARY

Computer Science undergraduate and aspiring data analyst who builds software that solves real problems, from computer vision and geospatial dashboards to embedded prototypes and browser 3D. Best Innovation Team at CHAKRAVYUH 1.0, national finalist at India Innovates 2026, two Python internships with a letter of recommendation, and the Google Data Analysis with Python specialization. Seven years of Sainik School and NCC training shaped a disciplined, team-first way of working.

EDUCATION

B.Tech, Computer Science & Engineering — GITA Autonomous College, Bhubaneswar Aug 2025 – 2029 (expected)

Sainik School Bhubaneswar — Class VI–XII; Class X & XII: 1st Division Apr 2018 – Mar 2025

TECHNICAL SKILLS

Languages	Python, SQL (MySQL), Node.js, HTML/CSS; basics of C and Java
Frameworks	FastAPI, Streamlit, Tkinter, Pygame, Three.js, Vite, Next.js, React
Data & AI	pandas, NumPy, Jupyter, data cleaning, Plotly, OpenCV, FastALPR (YOLOv9 + MobileViT OCR), TensorFlow Lite, Gemini API
Tools & platforms	Git & GitHub, Excel, Vitest, SQLite, Neo4j, Raspberry Pi, WebRTC, Vercel

EXPERIENCE

Back-End / Python Developer Intern — The Entrepreneurship Network May 2026 – Aug 2026 · Remote

- Built a multi-role Student Attendance Management System (Tkinter, SQLite) with SHA-256-hashed logins, session-locked QR-code attendance served from an embedded HTTP server, and alerts below 75% attendance.
- Covered Python data structures, file/CSV handling and Git; built a JSON-backed expense tracker. Received a Letter of Recommendation from the Director.

Python Programming Intern — InternPe May 2026 – Jun 2026 · Remote

- Delivered weekly object-oriented Python projects, including Connect Four with an AI opponent and Pong: AI Edition (Pygame).

PROJECTS

India's Toll Network — data analysis Python · pandas · SQL

- Cleaned a 2,003-plaza registry with a logged pandas pipeline, fixing or flagging 159 records (16 funding-type spellings, lost decimals, coordinates 650+ km off), then used SQL CTEs and window functions to find that 4 states hold 53.6% of plazas.

VANTAGE: ZERO — voice-controlled 3D combat flight game TypeScript · Three.js · Vite · Vitest

- Browser game with a 120 Hz flight model, four missions and a survival mode; terrain, audio and dialogue generated locally, covered by 81 automated Vitest tests. Built by voice for the Wispr Flow challenge, Hacker House Goa 2026. Live at vantage-zero.vercel.app.

Smart Toll Plaza Management & GIS Command Center Python · Streamlit · FastALPR · OpenCV · Plotly

- Real-time number-plate recognition on a WebRTC stream (YOLOv9 + MobileViT OCR) with Indian plate validation, blacklist screening and diplomatic exemptions; map of 2,000+ toll plazas, peak-hour pricing, role-based views and an audit-logged ledger.

GOD VIEW — OSINT digital-twin platform *(team project)* FastAPI · Neo4j · Next.js · CesiumJS

- Built the back-end ingestion for live flight (OpenSky), satellite (CelesTrak) and earthquake (USGS) feeds, with a 15-second cache, fallback data during API rate limits and validation of malformed responses. National finalist, India Innovates 2026.

UNSPOKEN — assistive wearable for visually impaired and non-verbal users *(team project)* Raspberry Pi · Python · Node.js · React

- Chest-mounted prototype with ultrasonic obstacle detection, haptic feedback and gesture-to-speech, running TensorFlow Lite on a Raspberry Pi Zero 2 W, with a Node.js WebSocket server feeding a React dashboard. Best Innovation Team, CHAKRAVYUH 1.0.

ACHIEVEMENTS

- **Best Innovation Team** — CHAKRAVYUH 1.0 National Hackathon (36 hours), GITA Bhubaneswar, Jan 2026 (₹10,000 prize)
- **National Hackathon Finalist** — India Innovates 2026, Bharat Mandapam, New Delhi, Mar 2026
- **Shortlisted** — Smart India Hackathon 2025 · Smart India Hackathon 2026 college round (ANUMATI), Sep 2026 · Hack For Green Bharat (Top 400), Feb 2026
- **Advanced to Phase 2** — ET Gen AI Hackathon, Mar 2026 · **Selected to compete** — Google Gemini's Fund My Crazy: Grand Ideation Night (CampusCrew), Sep 2026 · **Participant** — KSHITIJ 2026, IIT Kharagpur (Sand Rover), Jan 2026
- **8 hackathons since 2025**, 7 of them national: 1 win, 1 national final, 3 shortlists

CERTIFICATIONS

- **Google Data Analysis with Python** — Google / Coursera Specialization (6 courses: Python, NumPy, pandas, Jupyter), Jun 2026
- **Programming Fundamentals** — Duke University / Coursera, Dec 2025 · **Introduction to Microsoft Excel** — Coursera Project Network, Nov 2025
- **Digital Productivity with AI** — UNICEF YuWaah (Passport to Earning), score 100%, Dec 2025
- **Junior Software Developer, NSQF Level 3** (Grade A, 450 hours) — Skill India & NASSCOM IT-ITeS SSC, Apr 2024
- Coursera, Feb 2026: Critical Thinking & Logic · Deductive Reasoning & Mental Models · Emotional Intelligence · Handling Difficult Conversations

LEADERSHIP & ACTIVITIES

- **National Cadet Corps** — NCC 'A' Certificate (Navy wing, Grade A), Feb 2022 · NCC 'B' Certificate (Army wing), May 2025
- **Team ASTRA-X** — three-member hackathon team since early 2026 (CHAKRAVYUH 1.0 win, India Innovates finals, SIH 2026)
